### **Visuals in Patient education**

**Dr. Levent Efe**  
CMI-Levent Efe Medical Illustration Studios

Visual literacy is an integral part of Patient education. All visuals like illustrations, photos, videos, animation, and interactive platforms can be used in their unique narrative to empower the patient before making any decision about their health. In this talk titled "Visuals in Patient Education", we will discuss how all these visual tools can be used effectively to help general public understand medical issues and make informed choices. We will give several examples of how visual media can be better utilized to effectively provide Turkish public with valuable Health literacy tools.
